

μLab referee log

μLab name: _____ Date _____ Time _____ → _____

Driver **D1** _____ Driver **D2** _____

Mapper (works for both drivers) _____ Referee (you) _____

One mapper between the two drivers, one referee. You grade **both** drivers, so every note names the one it is about.

SESSION NOTES

time	who	what happened
------	-----	---------------

SOLUTION REACHED ☐ at _____ if not reached, what was missing _____

Most positive aspect/event in lab: _____

Negative aspects/events to remark: _____

DRIVERS · ONE MARK PER OCCURRENCE

- | | D1 | D2 |
|--|-------|-------|
| + states intent before typing | _____ | _____ |
| + asks in their own words | _____ | _____ |
| + reads the error before reacting | _____ | _____ |
| + restates the mapper's answer | _____ | _____ |
| - types, cannot say what for | _____ | _____ |
| - "ask the LLM to..." | _____ | _____ |
| - doesn't carefully read the error | _____ | _____ |
| - types a dictated line verbatim | _____ | _____ |
| - operates uncritically or not understanding | _____ | _____ |

MAPPER · ONE MARK PER OCCURRENCE

- | | |
|--|-------|
| + names a source | _____ |
| + checks the driver understood | _____ |
| + waits, lets the driver try | _____ |
| + re-prompts an LLM to understand its answer | _____ |
| - answer with no named source | _____ |
| - fails to listen carefully | _____ |
| - pre-empts, does not let the driver try | _____ |
| - feedback from a dubious source or raw LLM output | _____ |
| - serves one driver, leaves the other waiting | _____ |
